

*Industry-Leading  
Assortment of  
Structural,  
Clamshell and  
Hybrid Clamshell  
Decorative Bases*

**Decorative Base Options**

## Decorative Pole Products

Hapco has been providing the highest quality Aluminum Decorative Poles to Design Professionals and Landscape Architects for over six decades. From designs that blend with today's modern architectural styles, to historical designs that harken back to an earlier era, Hapco's extensive Decorative Base offering delivers industry-leading design options.

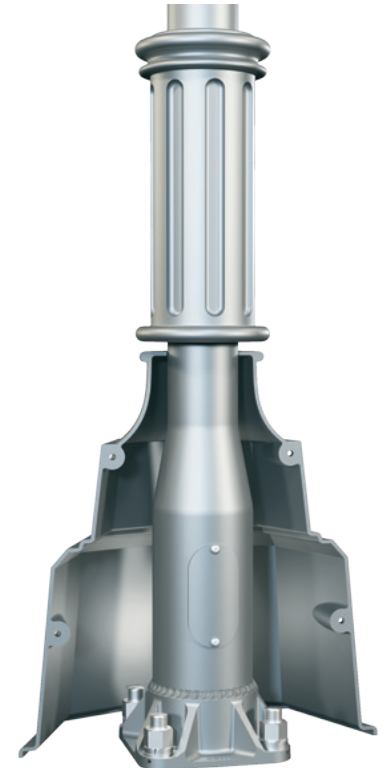

### Structural

Structural Aluminum Bases are welded to the bottom of the smooth or fluted shaft, contributing structural integrity to the pole.

### Clamshell

Clamshell Aluminum Bases are 2-Piece designs that are assembled and bolted around the base of the installed pole.

### Hybrid Clamshell

Hybrid Clamshell Aluminum Bases provide unique style options by combining a 2-Piece base with other decorative design features.

# HYBRID CLAMSHELL DECORATIVE BASES

**Solar Lighting International®, Inc.**

Phone +1 803-233-3461 | www.solarlightingintl.com

The Name Solar Lighting International® is a Registered Trademark.

58 PDF Catalog Pages.

386 Specification Sheets.

6,954 Standard Product Combinations.

Base Details, Pole Shaft Details, and EPA Tables for Straight Round, Tapered Round, Straight Fluted, and Tapered Fluted Options.

Solar Lighting International, Inc. offers a variety of Pole Accessory options for Decorative Poles. From Finials and Plant Hangers to Sign Brackets, Receptacle Outlets and Banner Arms.

*We Design and Fabricate Total Project Solutions.*

## Decorative Arms

From classic to contemporary to decorative, Solar Lighting International, Inc. has over 60 years' experience in designing and fabricating aluminum arms for projects containing diverse architectural styles.

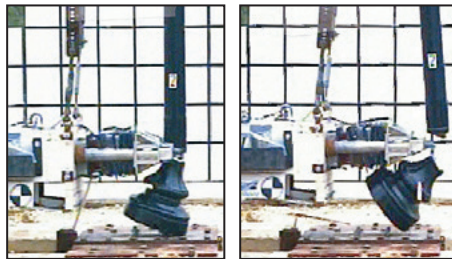

Sample Designs

Whether you are looking to create an integrated design that blends into existing streetscapes, or a unique design created for a custom project, Solar Lighting International, Inc. has the unparalleled experience and resources to fabricate quality **Arm Solutions**.

## Breakaway Options

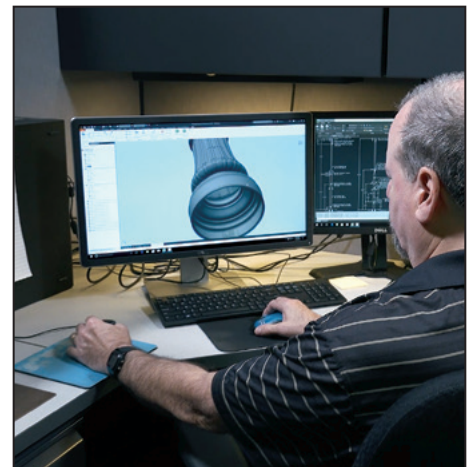

The Federal Highway Administration (FHWA) defines "**Breakaway**" as crash-tested devices that break or yield upon impact. Breakaway devices must meet rigorous impact testing, with accepted products mitigating the potential severity of crashes while providing a safer outcome in the event of a collision.

*Solar Lighting International, Inc. leads the industry in FHWA Accepted Decorative Breakaway options.*

## Custom Capabilities

Creating new and distinctive modern styles or bringing century-old, historically-relevant decorative streetscapes back to life, no one can duplicate Hapco's ability to deliver design professionals custom or unique designs.

Our *state-of-the-art* R&D and **Manufacturing Technologies** allow us to replicate and craft custom castings to match any architectural style. Simply provide the Solar Lighting International, Inc. Team with your project details to see how we deliver **Custom Decorative Solutions**.
